

Good Beer Guide satellite navigation POI files for Navman devices: Instructions for installation and use

IMPORTANT: Compatibility

*The Navman version of the current GBG POI file (GBG2018) is compatible with many Navman sat nav devices and PDAs capable of running Navman software. **However, please check that your device supports Custom POIs before proceeding.** Some Navman devices may require you to own a Connectivity Kit.*

Alternative versions of the GBG POI compatible with other sat-nav systems (TomTom and Garmin) are also available. Please check the CAMRA website: www.camra.org.uk/gbg-sat-nav

IMPORTANT: Device Resources

Before attempting to load the GBG POI file onto your sat-nav device, you should ensure that there is enough space on your device to do so (the GBG POI file requires approximately 300kB of space on your device). Some devices are also limited in the number of POI locations which they can support. For more information on the specifications of your device, please refer to its documentation.

IMPORTANT: Terms and Conditions

Before installing and using the GBG POI file, you should read the accompanying GBG POI Agreement & Terms. By proceeding, you agree to be bound by their conditions.

IMPORTANT: Drink Driving

The GBG POI aims to assist users in getting to Britain's best pubs and breweries (by car, motorbike, bicycle and foot), and it does not condone drink driving. You cannot calculate your alcohol limit, so don't try. If drinking alcohol, a non-drinker should be designated to drive you home. Alternatively, you could call a taxi, use public transport or walk home.

NAVMAN INSTALLATION

Once you have downloaded the GBG POI and un-zipped it into a folder onto your computer, the easiest way to copy the necessary files onto your sat-nav device is by following the information and steps given below.

IMPORTANT: Pubs and Breweries:

Please note that the POI information for pubs and breweries is contained in two separate data files, and each set of information is represented on the sat-nav screen

by a different symbol: Pubs by  and breweries by . Therefore, you will need to install the .csv or .asc (data) and .bmp (symbol) files for both the pubs and breweries onto your device in order for the GBG POI to function fully.

Navman software is required to load POIs onto Navman devices, which will have either been supplied with your device or can be downloaded from Navman's website: <http://www.navman.com/>. Unfortunately, there are many different software tools for loading custom POIs onto your device, depending upon your Navman model. **For example:** S-Series devices require the 'Navdesk' application.

In summary, the installation process is:

- 1) Connect your Navman to your computer and run the appropriate Navman software and select the appropriate option for loading 'Custom POIs'.
- 2) Select the 'GBG2018' POI file as the source file, and select other options as necessary.
Note: When selecting the GBG2018 POI file, you will first need to type '*.asc' or '*.*' into the file name and click 'Open' to display the files.
Also note: It is recommended that you delete any existing GBG files to ensure the latest data is used and to avoid confusion.
- 3) Click the "Add to Device" (or as appropriate) button
- 4) Close the software
- 5) Safely remove your Navman device from your computer (e.g. by right clicking it under 'My Computer' and selecting 'Eject'). When you are told that it is safe to remove the device, you can disconnect the cable.

USE

Once you have followed the steps above, your Navman device will be able to Navigate you to all the *Good Beer Guide* pubs and breweries.

For full details of how to browse and navigate to Points of Interest (POIs) on your Navman you should consult the owner's manual that came with the device or Navman's website, as above (www.navman.com).

SUPPORT

If, after following the instructions above, you experience any difficulties installing and using the file, you can contact CAMRA for help at:

gbgpoi@camra.org.uk

Version 5: 14 September 2017

We are especially interested to hear if you find a pub or brewery in completely the wrong location and if you find any other errors. If you do find you a serious error (e.g. a missing pub or brewery, an incorrect postcode or a wildly wrong location), which is subsequently confirmed, we will send you a free update to your current GBG POI file when an update is next published.

A Yahoo Group has been set up for CAMRA members who may wish to become involved in making their own POI files and helping improve the GBG POI. This can be joined via the website <http://uk.groups.yahoo.com/group/camrapoi/>
